

OFFICIAL RELEASE

Payerne, November 7, 2019

Speedwings Executive Jet GmbH adds a managed Embraer Phenom 300 to its brand new Payerne Airport base.

Speedwings Executive Jet GmbH is proud to announce the addition of a managed Phenom 300 to its fleet. The aircraft now available for charter is based in Payerne Airport where Speedwings has launched a new FBO and Premium Aircraft Residences earlier this year. This very low time and always hangared 2016 model is in pristine condition, with like new cabin.

Samuel Werner, COO of Speedwings Business SA says:

"The addition of this popular super light jet is an exciting milestone for us because on one hand this is the very first Swiss registered aircraft available for charter under our own Austrian AOC, and on the other hand, this addition confirms the know how of Speedwings Executive Jet GmbH in business jets management and strengthens our position in the super light jet segment.

At last, we secured a long term hangarage contract for our brand new outstanding premises in Payerne Airport."

The best-selling light business jet in the world seven years in a row, Embraer's Phenom 300 is offering a highly intuitive next-generation avionics, generous cabin space, revolutionary interior, best-in-class cabin altitude, and excellent performances.

The aircraft can fly up to 1'700nm and carry up to 9 passengers.

The company now operates under its own AOC a fleet of 3 x Phenom 300, 1x Citation Excel, 1x Citation Bravo and 1x Citation CJ2+. In the coming days, a brand new Embraer Praetor 600 will also join the fleet. In May, an order was signed with Swiss manufacturer Pilatus for 2x PC-24 which are planned for delivery in 2021 and 2022.
