Handling Services

PAYERNE AIRPORT⁺

Premium Aircraft Residences

About

Western Switzerland's perfect gateway,
Payerne Airport welcomes
Business Aviation Civil flights.

We ensure efficient aircraft and passengers handling
thanks to our dedicated General Aviation Terminal and
apron, which restrains passengers, crew and staff flows.

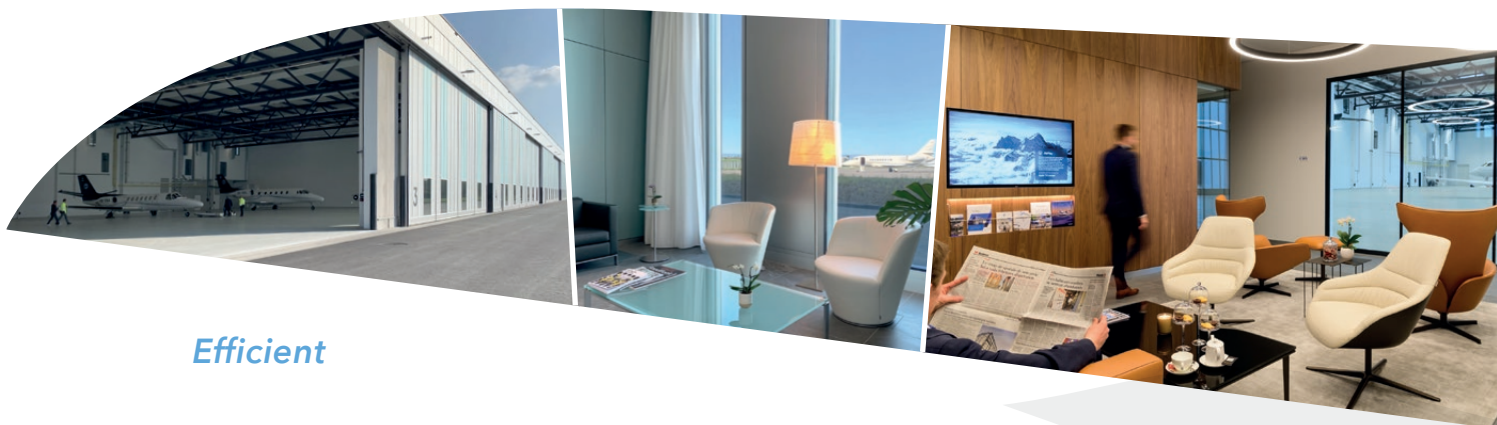

Your comfort, discretion and health safety are preserved.

The airport is part of a technological and industrial
park, covering more than 400'000m² of equipped
area. It offers many set up possibilities.

Safe

Our heated and fully secured hangars (cameras and restricted access) offer 6'600m² of Premium Aircraft Residence, adjacent to the VIP and General Aviation Terminal and welcomes any aircraft up to 9m height, meaning the biggest Bombardier, Dassault or Gulfstream fit in.

Efficient

We ensure fast tracks and short passengers' path.

Because your time is valuable to us, flights outside Schengen area can be handled directly in Payerne Airport, as Customs have their own office within the Terminal itself.

Fast

Our on-the-ramp fuel truck, board-to-board transfers possibility, and convenient location 4 minutes away from the motorway reaching Bern and Lausanne, ensure hassle free access to your plane and precious time saving.

State of the art

Our on-site rooms equipped with private showers and 4 stars like amenities enable crew or passengers to relax, and perform preflight duties in a quiet and protected environment, with direct access to their plane and crew lounge area.

Green

It is our Corporate Responsibility to reduce our environmental footprint. We have therefore decided for a 100% electric Ground Support Equipment such as belt loader, tractor, towing units and GPUs.

Electric power is delivered from our 4'000m² solar panels installation on the roof Terminal. Crew car e-models are also available right on site.

Make a discerning choice, fly from Payerne Airport!
